## LANGUAGE

- Thai
- English (basic)

## SKILLS

- PHP , Laravel
- Javascript
- ReactJs
- WordPress
- asp.net MVC core
- C# windows form
- Reading and wiring electrical circuits
- Network Config Vlan ACL Router
- PLC Mitsubishi and Omron (Basic)

## TRAINING IN COURSES

### API Node.js Express.js

Seniors come to train us on writing web applications, focusing on the backend and creating APIs.

### Mitsubishi GX work 2-3

Use gx work-3 to do projects with MPU-A , MPU-B , MPU-C stations to experiment with production processes in the industrial system, study from the media on the Internet and have senior teachers to help teach

### Network for organizations

Network design for small organizations There are sales, marketing, production and manager rooms.

### IOT Smart Farm

Use arduino esp8266 to make a smart iot farm. The working principle is when the humidity value reaches a specified value, order the contactor relay to change and then turn on the water pump late at night. The humidity value can be viewed on grafana via the mqtt protocol.

## EDUCATION

### Chana Technical College

Diploma/High Vocational Certificate  
major in electronics 2020-2022  
GPA 3.6

### King Mongkut's Institute of Technology Ladkrabang

Industrial education and technology major  
electronics technology 2022-2024  
GPA 3.08

## TOOLS

- Visual Studio,Code
- SQL Server, Phpmyadmin, mongoDB, DBeaver
- Postman
- Github
- Cisco Packet Tracer
- GX-Work2-3,CX-Programer
- Docker, Nginx (Basic)
- Kubernetes (Basic)
